

COLUMBIA ASSET ALLOCATION PORTFOLIOS - MODERATE AGGRESSIVE

Grow assets over the long term through strategic global diversification

Active and passive implementation

The portfolio invests in a mix of active and passive exposures, allocating to both mutual funds and ETFs.

Global multi-asset diversification

Meaningful diversification is achieved via exposure to a variety of global asset classes, including domestic equity, international equity, U.S. investment grade fixed income and high-yield.

Enhanced risk/return potential

Ongoing tactical adjustments to strategic allocations are made in an attempt to improve the risk/return profile over a full market cycle.

Management Team

The Columbia Threadneedle Global Asset Allocation Team consists of a group of 30 asset allocation professionals from a variety of diverse backgrounds. The Global Asset Allocation Team collaborates daily to evaluate economic conditions, opportunities and risks across global capital markets. With a comprehensive global view point, these experienced investment professionals seek to incorporate the key elements of **diversification, insight** and **flexibility** in an effort to create efficient and resilient asset allocation portfolios that can potentially deliver more consistent performance. An ongoing emphasis is placed on delivering strong risk-adjusted returns for investors over time.

Past performance does not guarantee future results, and investing involves risk including the risk of loss of principal. There is no guarantee the objective will be achieved or that any return expectations will be met.

Returns reflect the reinvestment of dividends, income, and capital gains and are calculated and stated in US dollars. Periods over one year are annualized.

Pure Gross of fees performance does not include platform, or program sponsor, trading costs, administrative management fees, or other expenses that would be incurred by a participant portfolio but does reflect the deduction of investment expenses for the underlying mutual fund and ETF investments. Net of fees performance also reflects deduction of the maximum annual wrap fee of 3%. Investors should contact their financial advisor or program sponsor for fees applicable to their account. Composite performance represents the live track record for discretionary wrap SMA accounts managed by Columbia Management Capital Advisers, an operating division of Columbia Management Investment Advisers, LLC that offers investment management and related services to clients participating in various types of wrap programs.

* Average underlying expenses are a weighted average of the net expense ratio of each fund or ETF held in the model portfolio as of the date shown. Actual expenses will vary based on the underlying investments used, the percentage of the portfolio allocated to each investment, and the net expense ratio of each investment, including any waivers or reimbursements in place. Investors should contact their financial advisor or program sponsor for additional fees applicable to their account.

These managed account programs are only available through investment professionals. Not all strategies may be available on all platforms, and fees and terms may vary. Managed account programs may not be appropriate for all investors.

Investment risks – The portfolios are subject to the investment performance (positive or negative), risks and expenses of **underlying funds** in which they invest. Securities in which these funds invest involve risks including but not limited to **market risk, price volatility, credit risk, interest rate risk, prepayment and extension risk, political/economic risk, currency risk, and liquidity risk.**

International investing involves certain risks and volatility due to potential political, economic or currency instabilities and different financial and accounting standards. Risks are enhanced for **emerging market** issuers. **Non-investment grade** securities have greater credit risk and volatility. **Asset allocation and diversification** does not assure a profit or protect against loss. **ETFs** trade like stocks, are subject to investment risk and will fluctuate in market value.

Percentages may not add up to 100 due to rounding.

This is an actively managed strategy that is designed for a moderate aggressive investor. The strategy is intended to provide broad-based market exposure and is comprised entirely of proprietary mutual funds and ETFs. Equity exposures are both domestic and international while fixed-income exposures are predominately domestic. There is a 50% maximum allocation to proprietary mutual funds; however, these allocations will be permitted to rise above 50% in-between rebalance dates due to market fluctuation. The benchmark is 65% MSCI ACWI All Cap Index/ 35% Bloomberg Barclays US Aggregate Bond Index.
