2022 CORPORATE DIVIDENDS RECEIVED DEDUCTION INFORMATION

The tax information below is for Columbia fund corporate shareholders.

If your corporation invests in the funds listed below, you may be able to take advantage of the dividends received deduction (DRD) for corporations. A specified portion of the dividends paid by these funds may be eligible for the DRD. Funds that invest mostly in domestic U.S. stocks generally have a high portion of DRD-eligible dividends.

Note that you may not take this deduction for a dividend on shares of a fund that you have held for less than 46 days during the 91-day period beginning 45 days prior to the ex-dividend date of a fund distribution. Corporate shareholders should consult their tax advisors regarding this requirement and other potential limitations.

How to calculate your corporation's dividends received deduction:

Step 1: For each applicable fund, multiply the qualifying percentage listed in the table below by your ordinary dividends from that fund for the year. For tax purposes, ordinary dividends include short-term capital gains distributed by the fund but not long-term capital gains.

Step 2: Then, as part of your tax return preparation, multiply your answer from Step 1 above by 50% to obtain your federal dividends received deduction. Additional DRD limitations may apply. Be sure to consult with your state tax authority or tax advisor regarding the state and local tax status of these distributions. If your fund is not listed below, it did not qualify to report this deduction.

Fund name	Symbol	Qualifying percentage
Columbia International ESG Equity Income ETF (FKA-Columbia Sustainable International Equity Income ETF)	ESGS	0.00%
Columbia U.S. ESG Equity Income ETF (FKA-Columbia Sustainable U.S. Equity Income ETF)	ESGN	100.00%

ETF shares are bought and sold at market price (not NAV) and are not individually redeemable. Investors buy and sell shares on a secondary market. Shares may trade at a premium or discount to the NAV. Only market makers or "authorized participants" may trade directly with the Fund(s), typically in blocks of 50,000 shares. Although the Fund's shares are listed on the Exchange, there can be no assurance that an active, liquid or otherwise orderly trading market for shares will be established or maintained.

Investing involves risks, including the risk of loss of principal. **Market** risk may affect a single issuer, sector of the economy, industry or the market as a whole. Fixed-income securities present **credit** risk, which includes **issuer** default risk. The fund is subject to **municipal securities** risk, which includes the risk that the value of such securities may be affected by state tax, legislative, regulatory, demographic or political conditions/factors, as well as a state's financial, economic or other conditions/factors. The fund may invest materially in a single issuer and, therefore, be more exposed to the risk of loss than a fund that invests more broadly. **Prepayment and extension** risk exists because the timing of payments on a loan, bond or other investment may accelerate when interest rates fall or decelerate when interest rates rise which may reduce investment opportunities and potential returns. A rise in **interest rates** may result in a price decline of fixed-income instruments held by the fund, negatively impacting its performance and NAV. Falling rates may result in the fund investing in lower yielding debt instruments, lowering the fund's income and yield. These risks may be heightened for longer maturity and duration securities. **Non-investment-grade** (high-yield or junk) securities present greater price volatility and more risk to principal and income than higher rated securities. The fund is **passively managed** and seeks to track the performance of an index. The fund's use of a **"representative sampling"** approach in seeking to track the performance of its index (investing in only some of the components of the index that collectively are believed to have an investment profile similar to that of the index) may not allow the fund to track its index with the same degree of accuracy as would an investment vehicle replicating the entire Index. The fund may not sell a poorly performing security unless it was removed from the **index**. There is no guarantee that the index and, correspondingly, the fund will achieve positive returns. Risk exists that the index provider may not follow its **methodology** for index construction. Errors may result in a negative fund performance. The fund's **net asset value** will generally decline when the market value of its targeted index declines. Although the fund's shares are listed on an **exchange**, there can be no assurance that an active, liquid or otherwise orderly trading market for shares will be established or maintained. The fund's **portfolio turnover**, as it seeks to track its index, may cause an adverse expense impact, decreasing the fund's returns relative to the index, which does not bear transactions expenses. There may be additional portfolio turnover risk as active market trading of the fund's shares may cause more frequent creation or redemption activities that could, in certain circumstances, including if creation and redemptions units are not affected on an in-kind basis, increase the number of portfolio transactions as well as tracking error to the index and as high levels of transactions increase brokerage and other transaction costs and may result in increased taxable capital gains. Market or other (e.g., interest rate) environments may adversely affect the **liquidity** of fund investments, negatively impacting their price. Generally, the less liquid the market at the time the fund sells a holding, the greater the risk of loss or decline of value to the fund.

Columbia Management Investment Advisers, LLC serves as the investment manager to the ETFs. The ETFs are distributed by **ALPS Distributors, Inc.**, member FINRA, which is not affiliated with Columbia Management Investment Advisers, LLC

Columbia Threadneedle Investments is the global brand name of the Columbia Threadneedle group of companies.
