

SEPARATELY MANAGED ACCOUNT

COLUMBIA US GOVERNMENT STRATEGY

Customized portfolio supported by risk management

Conservative, high quality bond portfolio constructed of U.S. Treasuries and U.S. government agency fixed income securities

Emphasis on fundamental credit research

Active management decisions designed to maximize risk/reward based on expertise in the Treasury and Agency Mortgage markets

Ongoing portfolio monitoring

Daily risk and performance monitoring to ensure the portfolio is behaving as expected and adjust exposure as markets change

Portfolio Management

David Janssen, CFA14 years of experience

Alex Christensen, CFA11 years of experience

Investment Objective

The strategy seeks current income combined with preservation of capital.

Investing involves risk including the risk of loss of principal. There is no guarantee the objective will be achieved or that any return expectations will be met.

Past performance is not a guarantee of future results. Composite returns reflect the reinvestment of income and capital gains and are calculated and stated in US dollars, and periods over one year are annualized. Pure gross of fees performance does not include trading costs, management fees, or other expenses that would be incurred by a participant portfolio, but does reflect the expenses of any underlying fund and ETF investments. Net of fees performance reflects deduction of the maximum annual wrap fee of 3%. Investors should contact their financial advisor or program sponsor for fees applicable to their account.

10+ Years	19.0

**Investment risks** — There are risks associated with **fixed-income** investments, including **credit** risk, **interest rate** risk, and **prepayment and extension** risk. In general, bond prices rise when interest rates fall and vice versa. This effect is usually more pronounced for longer term securities. The **U.S. government** may be unable or unwilling to honor its financial obligations. Securities issued or guaranteed by federal agencies and U.S. government-sponsored instrumentalities may or may not be backed by the full faith and credit of the U.S. government. **Mortgage-backed securities** are affected by interest rates, financial health of issuers/originators, creditworthiness of entities providing credit enhancements and the value of underlying assets.

Advisory services provided by Columbia Management Investment Advisers, LLC ("CMIA"). For purposes of GIPS compliance, the Firm is defined as Columbia Threadneedle Investments Global Asset Management ("Columbia Threadneedle Investments GAM"), which includes accounts managed by the investment manager and certain of its affiliates. Columbia Threadneedle Investments Global Asset Management claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. To receive a list of composite descriptions of Columbia Threadneedle Investments Global Asset Management and/or a presentation that complies with the GIPS standards, please send a request to [salesinquiries@columbiathreadneedle.com](mailto:salesinquiries@columbiathreadneedle.com).

† Third-party rating agencies provide bond ratings ranging from AAA (highest) to D (lowest). When three ratings are available from Moody's Ratings, S&P and Fitch, the middle rating is used. When two are available, the lower rating is used. If only one is available, that rating is used. If a security is Not Rated but has a rating by Kroll and/or DBRS, the same methodology is applied to those bonds that would otherwise be Not Rated. Bonds with no third-party rating are designated as Not Rated. Investments are primarily based on internal proprietary research and ratings assigned by our fixed income investment analysts. Therefore, securities designated as Not Rated do not necessarily indicate low credit quality, and for such securities the investment adviser evaluates the credit quality. Holdings of the portfolio other than bonds are categorized under Other. Credit ratings are subjective opinions of the credit rating agency and not statements of fact and may become stale or subject to change.

**Duration** measures the sensitivity of bond prices to changes in interest rates. Bonds with a higher duration experience greater price volatility from interest rate movements. **Yield-to-worst** is the lowest return that can be received on a bond without default and assumes the bond is called or redeemed by the issuer at the earliest opportunity.

This information does not constitute investment advice and is issued without regard to specific investment objectives or the financial situation of any particular recipient. Individual portfolio performance and holdings may differ from information shown due to decisions made by the program sponsor, the size and timing of cash flows and client-specific investment guidelines and objectives.

The **Bloomberg U.S. Aggregate Government Index** is a benchmark that measures the performance of all public U.S. government obligations with remaining maturities of one year or more. Index returns reflect the reinvestment of dividends and other earnings. It is not possible to invest directly in an index.
